DETAILED ACTION

Double Patenting

1. Claims 34-37, 39-49 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 31-33 of U.S. Patent No. 6,421,559.

Although the conflicting claims are not identical, they are not patentably distinct from each other because it is obvious to compress a breast to image tissue using x-ray.

Allowable Subject Matter

2. Claims 38 and 50 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Organ '544 teaches using electrical impedance for detecting tumors in tissue.
